

Automated shift planning

Automate manual tasks to create compliant, error-free schedules
that work for you and your team

“Normally my managers spend 2–3h per month planning shifts, with this feature I expect this to be reduced to around 1h.”

Clementina Verrocchio, Store Manager and early adopter of automatic shifts
Forno Brisa, 284 employees

Scheduling shifts just got a lot easier...

Save time

using automations to cut down on manual tasks

Stay compliant

meeting labor laws and employee context

Boost trust

planning shifts around employee needs

Eliminate errors

with built-in checks and platform sync

Managers could save
up to
80%
of time spent on shift
scheduling by automating
the process

Effortless and compliant shifts—in just one click

Forget wasting countless hours on spreadsheets.

Automatically schedule shifts that meet business needs, comply with labor laws and match employee preferences.

Automate your shifts in 3 steps

Define your rules

Define the parameters that you want the platform to consider when scheduling the shifts, such as:

- ✓ Days off
- ✓ Maximum working hours per employee
- ✓ Minimum rest periods

Make sure every schedule respects legal, contractual and team-specific requirements.

Publish your shift

Once automatic scheduling is complete, you can:

- ✓ Check alerts to ensure compliance and maximum hours are not exceeded
- ✓ Confirm all shift needs have been covered

Scheduling complete! An email notification will be sent to your employees once the schedule is published.
